

Experience MILCOM 2015

The Premier International Conference for Military Communications

MILCOM 2015 celebrates the 34th anniversary of the premier international conference for military communications. "Leveraging Technology - The Joint Imperative" gathers the leading minds of government, military, industry and academia in an interactive forum to further explore and define the benefits that joint-level collaboration bring to current and future communication challenges. The annual conference will take place October 26-28, 2015, at the Tampa Convention Center in Tampa, Florida. Leaders from around the world will address the critical role communications plays in military readiness and operations. The Tampa location is ideal for this discussion, with close proximity to the MacDill Air Force Base military community, U.S. Special Operations Command (SOCOM), U.S. Central Command (CENTCOM) and the 6th Air Mobility Wing. MILCOM offers industry the opportunity to discuss communications technologies and services with decision makers from all branches of the armed forces, the Department of Defense, federal agencies and multinational forces.

In the MILCOM tradition, the conference will feature an outstanding series of technical presentations, discussions and tutorials, as well as nearly 30,000 square feet of industry exhibits all under one roof. It will include more than 300 unclassified and restricted technical presentations, tutorials and panel discussions led by experts in defense communications. Topics will include the spectrum of command, control, communications, computers, intelligence, surveillance and reconnaissance (C4ISR) technologies and capabilities that address 21st century communications challenges related to national defense, homeland security, disaster response and interoperability. Continuing education credits will be available to all attendees.

How can we help?
