Welcome to MobiSPC 2014

Mobile Systems and Pervasive Computing (MobiSPC) have evolved into an active area of research and development. This is due to the tremendous advances in a broad spectrum of technologies and topics, including wireless networking, mobile and distributed computing, sensor systems, RFID technology, and the ubiquitous mobile phone. MobiSPC-2013 solicits papers that focus on the theory, systems, practices and challenges of providing users with a successful mobile or wireless experience. This includes how mobile computing changes how people pervasively use their computers, computing resources and applications, as well as the systems, services and technology enabling those applications.

MobiSPC-2014 will provide a leading edge, scholarly forum for researchers, engineers, and students alike to share their state-of-the art research and developmental work in the broad arena of pervasive computing and communications. The MobiSPC-2014 will be held in conjunction with the 9th International Conference on Future Networks and Communications (FNC 2014).

All MobiSPC 2014 accepted papers will be published by Elsevier Science in the open-access Procedia Computer Science series on-line. Procedia Computer Science is hosted on www.elsevier.com and on Elsevier content platform ScienceDirect (www.sciencedirect.com), and will be freely available worldwide. All papers in Procedia will be indexed by Scopus (www.scopus.com) and by Thomson Reuters’ Conference Proceedings Citation Index (http://thomsonreuters.com/conference-proceedings-citation-index/). The papers will contain linked references, XML versions and citation DOI numbers. You will be able to provide a hyperlink to all delegates and direct your conference website visitors to your proceedings. All accepted papers will also be indexed in DLIB (http://dlib.org/index.html).
